Spring 1988

New V6 Commodore

YOU'LL LOVE IT!

What the papers say

General's VN gives Ford curry

"Everyone at Fishermens Bend seems to be floating on air about the basic package they have and they are confident it will give Ford's EA Falcon some curry. After a couple of days playing with the car I have no reason to disbelieve them.

The V6 engine is an intriguing mix of old and new technology ... whatever its origins, the bent six delivers lots of good old-fashioned grunt. This is going to be mightily impressive to buyers."

- THE SUN, MELBOURNE

New Commodore is roomier

"Australian car buyers love space ... and space has been the Falcon's trump in the sales game ... now the Commodore has as much interior room. That it was done so well is a credit to local design.

Inside the wider cabin ... the local team did a fine job in shaping and laying out the controls.

The new V6 engine can propel (the VN) faster than the Falcon using less fuel. No wonder Ford is worried."

- THE AGE, MELBOURNE

New Commodore is set to outclass its rivals

"...the question on everybody's lips is whether the VN Commodore is better than the EA26 Falcon. The answer ... is an unequivocal "yes". It offers a value-for-money package which buyers will find hard to resist.

The new imported fuel-injected 3.8 litre V6 engine ... pumps out more power than the old V8 and seems possessed of stump-pulling torque capabilities."
