

GMH MOTORING CLUB ACTIVE

MEMBERS of the Fishermen's Bend GMH Motoring Club met in the Theatre last month to re-organise the affairs of the Club. They confirmed the guiding principles of the Club—to promote safe driving, good driving and road courtesy.

New members were welcomed, and election of officers resulted:—

President: R. W. ARCHER, Experimental Engineering.

Vice-President: B. HARBER, Dynamometer Section.

Secretary: P. POLLAK, Production Engineering.

Treasurer: T. C. ARCHER, Maintenance Dept., Plant 3.

Plant Representatives: RAY JENNER, Plant 2; SYD. McDONALD and ROY MARTIN, 3; ERIC THIELE and LEO. MATTHIESSON, 5; PETER SAYLE, NASCO.

Retiring officers, including Past President G. A. EASTWOOD, Secretary B. JOHNSON and Plant 1 Representative H. KELLY, were thanked for their pioneering services to the Club in the two years of its existence.

Among new members welcomed was ROY MARTIN, of Electrical Laboratory, Plant 3. Roy recently returned from the GM Institute at Flint, Michigan, where he helped inaugurate a motoring club among the students. He has some interesting experience to bring to the Club.

Members and their families paid a most enjoyable visit to the Exhibition of Racing Cars at Wirth's Olympia early in October. At the end of that month a well-attended meeting heard an interesting lecture on the REDEX TRIAL by crack Holden drivers LEX DAVISON and STAN JONES.

On Saturday, November 15, a picnic run will be held to a beach resort under the direction of Bruce Harber. A Car Gymkhana is being organised for later in the year.

Employees interested in joining the Club are asked to contact Plant Representatives or Committee members. Annual subscription of 2/- brings facilities apart from participation in the social and sporting activities of the Club. These include associate membership of the Phillip Island Auto Racing Club, which can be arranged through the Sports and Social Club Secretary.
