

## INTER-ORGANIZATION LETTER

To Distribution Overleaf  
From C.J. Shattock  
Date 3/10/75  
Subject EMISSIONS TEST FACILITY ORGANISATION

The Emissions section is to be reorganised in order to better cope with the very high work load imposed by ADR 27A. This high test load is combined with a large transient load due to the start-up of a new facility.

To utilise each man's experience to the facility's best advantage, the following organisation is to be effective Monday 6 October.

Mr. **ROBERT BLOW** will assume the position of Supervisor - Emissions Test Facility, reporting to Mr. C.J. Shattock. Mr. Blow will be responsible for developing and maintaining maximum operating efficiency of the Facility with its new equipment, and has the line authority to carry this out.

Mr. **RUSSELL LITTLE** will become Assistant Supervisor - Emissions, and will be responsible for all staff functions. Principal immediate tasks are obtaining approval of the design rule Administrator for the new equipment and completion of building works associated with the facility.

Mr. **RAY BORRETT** will transfer from Vehicle Test Section to Emissions Test to aid in the setting up of tests and processing of data.

Your continued co-operation with these men in their new responsibilities will be appreciated.

A handwritten signature in cursive script that reads 'C.J. Shattock'.

C.J. SHATTOCK  
Asst. Experimental Engineer - Proving Ground
